FINANCING EUROPE

2027

How does Europe get its own capital
moving into what it must build?

THE AUDITORIUM, 2025 EDITION

Maria Luísa Albuquerque, European Commissioner for Financial Services and the Savings and Investments Union, gives the keynote address at the 2025 edition.

THE 2027 EDITION

From reform to implementation

Europe has set out what it wants to build: defence capacity, energy infrastructure, clean industry, digital capacity and companies that grow to global scale. Financing it is the harder part. The savings already exist. The question is why they still do not reach those investments.

€800bn

of additional investment needed every year, the top of the Draghi report's range. Draghi report (2024).

Europe's investment agenda has moved from strategy into implementation. EU leaders have called for agreement on the central reforms by the end of 2026, and talks on the next EU budget are under way.

On the Commission's figure, more than 300 billion euro of EU savings goes into foreign assets each year, on net.
